Assessment Application Introduction

The **Assessment** Application on the web provides a way to enter ACT, SAT and other test scores into the SIS system. Scores are displayed on the Student Credit Evaluation Report for use in the SEOP and scheduling process.

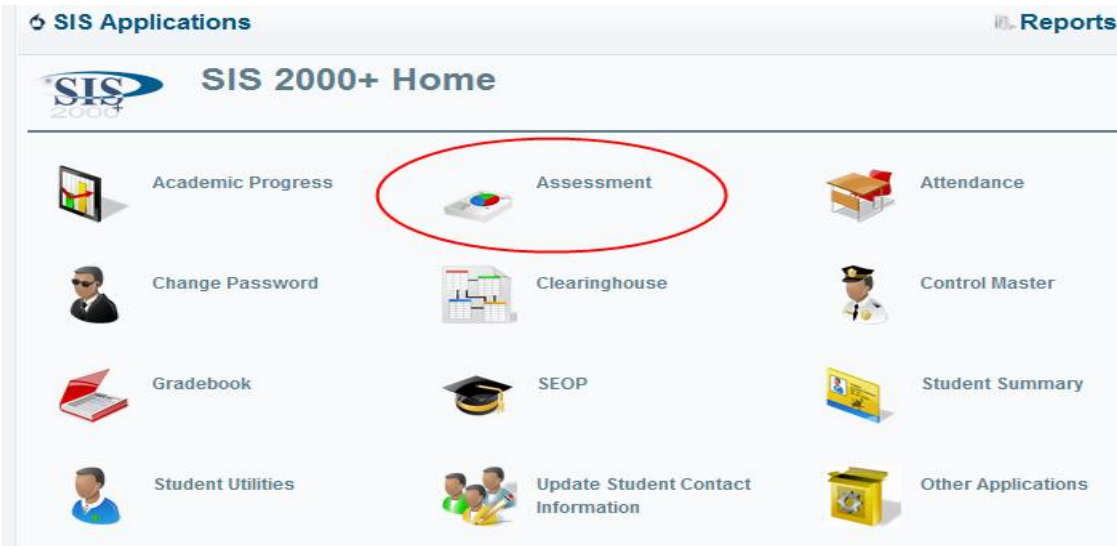

The Assessment Application contains applications to carry out 3 tasks.

1. Test Type and Test Schedules are created in **Assessments**. Scores for a Scheduled Test are entered through **the Student Assessment Scores** application. Assessments and Student Assessment Scores work together.
2. **Reading Assessment** provides a way to capture and maintain student reading interventions through grades 1 – 3.
3. Student **CRT, DWA, and UALPA Scores** allows viewing of student scores provided by the Utah State Office of Education Testing Data. (These are view only applications).
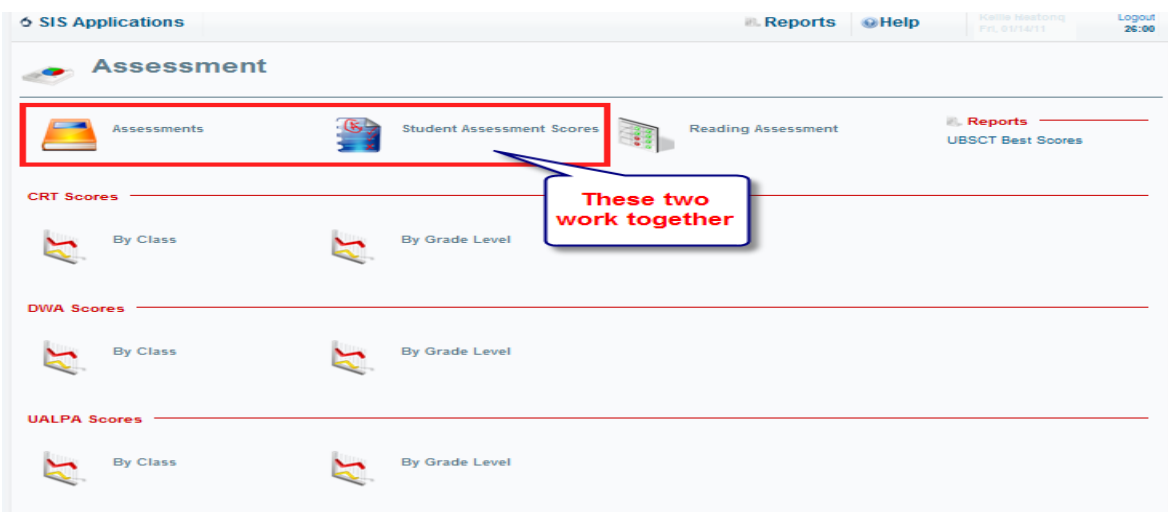

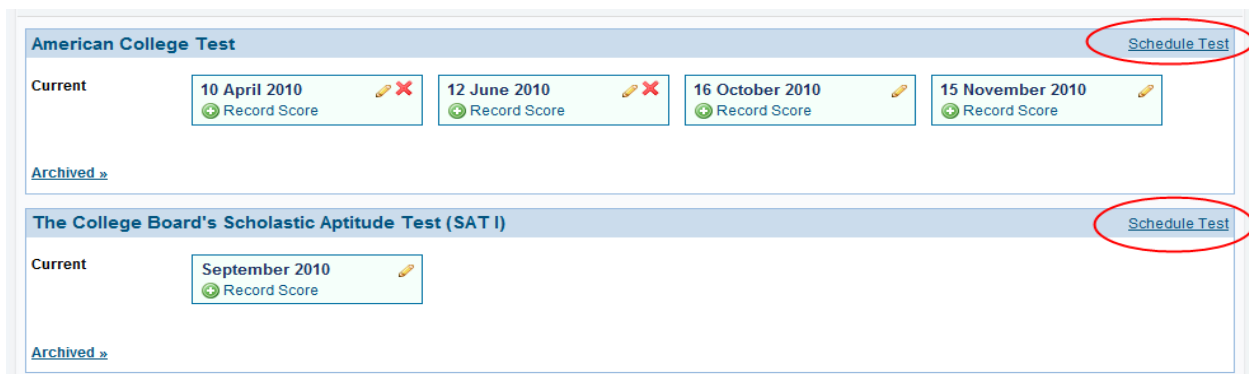

Manage Test Information with Assessment & Student Assessment Scores

"**Assessments**" lets you schedule when a test is offered. (It also lets you define your own test types.)
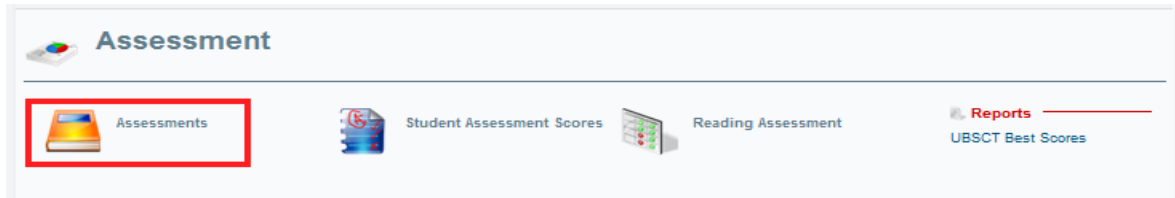

Scheduling a Test

To schedule a test click the **Schedule Test** link to the right of the appropriate test type

Month and Year are required. Day is optional.

Then Click "Save" >>

And "Okay".

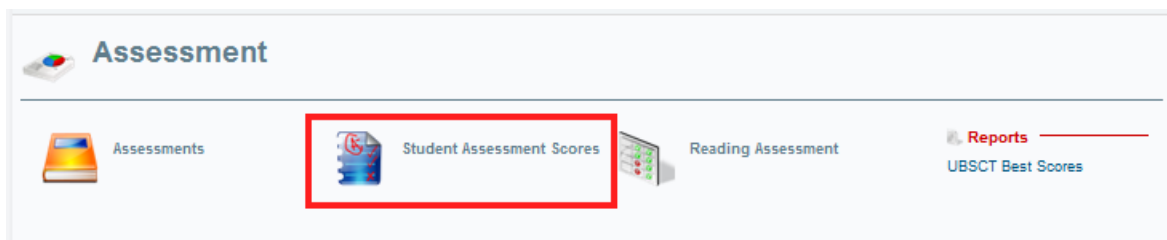

Entering Student Scores

Once assessments have a scheduled date, you can record student scores.

There are two ways to record student scores.

Click **Record Score** from inside the Assessments screen.

OR Select **Student Assessment Scores** from the Assessment Application's main menu.

Find a student (Check the "Include Exited:" box if you need students not currently enrolled.)

Select a student from the search results by clicking the student's name.

Click "**Record New Scores**". Select the desired test date. You may need to click "**Archived**" to display a list of past tests. If there is no test date for the date you need, you will go back to **Assessment** and create a new test date (above).

Enter the scores and click "Save".

And click "Okay".
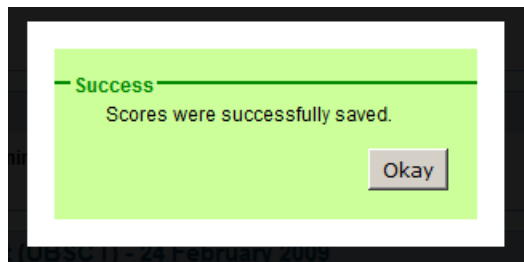

From the student list of tests you may **Record New Scores** (bottom right link) or click "**(change)**" to work with another student (use the link by student's name).

Defining a New Test Type

From the **Assessments** screen begin by clicking the "Create New Assessment Type". (Notes: 1. Test Types are usually defined when a new test type is introduced and should not be created for each test. 2. LEA created tests may not appear on reports)
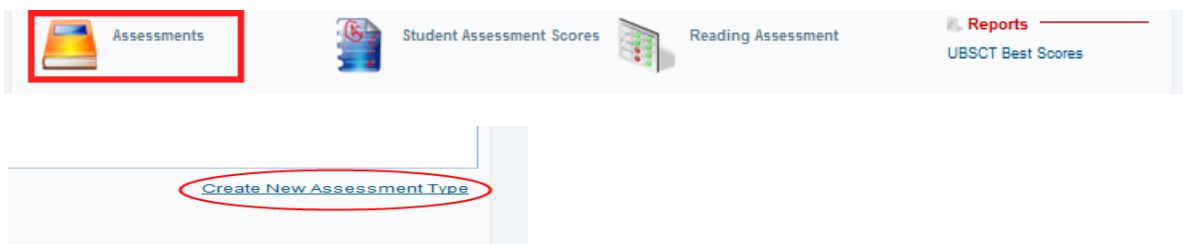

Complete the information about your New Test Type and click "Save"

Get it right or enjoy this type of error:

Click the "X" to delete a test. (Only Tests with NO Scores recorded may be edited or deleted.)

Click the "Delete >>" button.

Test Scores on Credit Evaluation Report

Certain types of scores entered into Assessments show on the Student Credit Evaluation Report for use by counselors and others in the SEOP process.

The scores are displayed at the bottom of the Student Credit Evaluation Report.

    Counselor/Advisor_____   Parent_____

Reading Assessment

Reading Assessment lets 1st - 3rd grade teachers provide state required reading at grade level and intervention information. Checking the appropriate check boxes updates the student's reading information. This information is tabulated for administrators in a separate report.

You have three testing sessions Fall, Mid-Year, and Spring. The only time the column to enter information will be open is when it is that testing session. Fall will be open first of the school year until November 30, Mid-Year will be open December 1 until March 4th and Spring will be open March 5th until end of school year. If you have not entered information and the window closes, contact your school's or district's SIS Administrator and they can set the permission to open a window in Control Master.   In prior testing sessions you will see symbols, if you hover over them you will see what the meaning is.

Assessment Scores

CRT, DWA and UALPA scores show the results stored in the USOE Assessment Data Warehouse. These scores are available for view only. (Initial load of information may take 10 – 15 seconds or longer as data is transferred between systems.)

Depending on your permissions you can see "By Class" and / or "By Grade Level" (usually only available to School Adminstration).
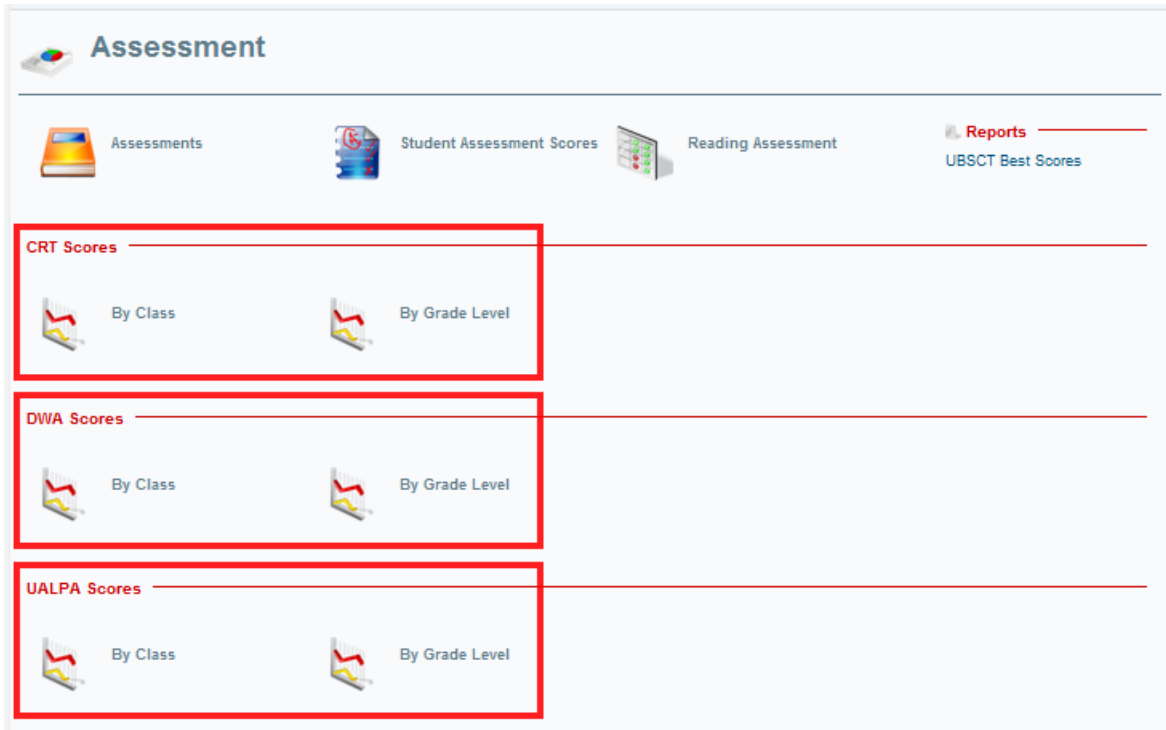

Viewing Assessment Scores

Choosing Track, Term and Class or Grade refines what information is retrieved. The "Group by" and "Show Test Types" choices determine what information is displayed and in what order. These choices will vary depending on the information elements associated with specific tests.

Griffin, Lashinda Rene	2 (155)		1 (145)	1 (147)	1 (147)	1 (145)	1 (136)	1 (150)	1 (130)
Grijalva, Octavea Dee	4 (176)	1 (150)	2 (155)	4 (169)	3 (166)	3 (160)	4 (172)	3 (166)	4 (171)

Changing the "Group by:" selection to "Test" changes the organization of the test information. Each of the columns are grouped by test.

Clicking the "Show Test Types" link displays the test label next to the score.

Color codes help to visualize pass / no pass results.

Downloading Assessment Scores

Clicking the "Download as .csv" lets you download the data for manual manipulation in Excel or other spreadsheet or database program.

Assessment Application in Review

The **Assessment** Application provides a way to enter ACT, SAT and other scores into the SIS system. These scores display on the Student Summary Report and some, but not all, show on the Credit Evaluation Report for use in the SEOP process. Scores are view only in the SIS 2000+.

Test Type and Test Schedules are created in **Assessments**. Scores for a Scheduled Test are entered through **the Student Assessment Scores** application. The **Reading Assessment** application provides a way to capture and maintain student reading interventions through grades 1 – 3. Student **CRT, DWA, and UALPA Scores** allows viewing of student scores provided by the Utah State Office of Education Assessment Data Warehouse. (These are view only applications).
